Four rulings on the P4 API shape (09-24)

1

NDTwin owns the route table

`owner: ndtwin`
package entries
refused at pre-flight

done

2

No .p4 changes

liveness from a
root veth heartbeat

owned tables: done

external: open

3

GUI reads capabilities once

greys out what a
switch cannot do

proxy: done

kernel · GUI: open

4

Seven same-shape programs first

one table:
`roles.ipv4_route`

ipv4_route: done

multi-table: later
