ndt apps

start the readers and apps, and find what they left

HOW YOU CALL IT

`ndt apps`	an interactive picker, when you are on a terminal
`ndt apps <names>`	start those readers
`ndt apps orphans`	what is still running that nobody is tracking

WHAT ITS EXIT CODE MEANS

0	nothing untracked
1	untracked processes are running
2	you called it wrong

THE SHARP EDGE — **read the tally line, not the exit code — that is what the readers were taught to judge by**
