ndt claim

reserve the lab, so nobody tears it down under you

HOW YOU CALL IT

`ndt claim`	thirty minutes, the default
`ndt claim 75 "<note>"`	seventy-five minutes, and say what you are doing

WHAT ITS EXIT CODE MEANS

0	the lab is yours
1	somebody else holds it
2	NDT_OWNER is not set

THE SHARP EDGE — **two claims in the same millisecond were both granted, 2 times in 16 — there was no lock between the read and the write**
